

Denver Boulder Couriers Seeks Python Software Programmer

Immediate opening.

We are seeking an individual for Python continuing application development of our current software, with the focus on upgrading Python 2.3 framework applications to current Python.

Main required skills and experience:

- Minimum of 3 years experience in Python application development (Mac and Windows), with a strong emphasis on user interface design.
- Minimum of 3 years MySQL database development
- Experience with credit card payment processing (Authorize.net), and mapping technology.

Other skills and experience that could come in handy:

- PHP programming
- Apache web server and email administration
- Web Services, API integration
- Mobile App development

Candidate Characteristics

- Team player with a can-do attitude
- Passionate about your work and getting it right
- Hits committed timelines while maintaining an agreed upon budget
- Ability to clearly communicate complex and technical concepts
- Excellent organizational skills
- Creative problem-solving skills
- Enjoy working as part of a team and independently
- Willingness to learn and adapt to new challenges
- Candidate can work remotely
